Forecast for Friday 26 Jul 2024

Weather: Patchy low cloud covering western hills overnight and to start the day but this will quickly lift and clear to leave a day of sunny spells. There's a chance of a light shower, mainly during the morning before becoming largely dry across the Park. There is some uncertainly in the far south of the Park during the afternoon where showers may persist a little longer.

Chance of cloud-free hill tops above 800m: 40% in the west at first, 70% in the east, becoming greater than 95% by the afternoon.

Low Cloud and visibility: Patchy low cloud with bases 300-400m on western upslopes overnight and during the start of the morning, but this lifts and clears to leave a fine day with cloud bases above the summits for the most part, perhaps grazing the highest peaks in any showers. Visibility poor in the west of the Park at first, mainly in association with cloud but becoming very good by the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are expected tomorrow with prolonged sunny spells, appropriate sun protection should be worn.

Forecast for Saturday 27 Jul 2024

Weather: Low cloud covering southwestern upslopes at first, with cloud bases generally rising before turning increasingly cloudy with scattered showers lasting for much of the day, perhaps heavy at times. Showers fizzle out into the evening, followed by clearing skies. High UV levels.

Maximum wind: Southwesterly 15-20mph gusting 25-30mph.

Chance of cloud-free hill tops above 800m: 30% at first becoming 80% in the afternoon and greater than 95% by the evening.

Low Cloud and visibility: Scattered cloud covering hills above 300m at first lifting to above summits in the afternoon, but falling back down to 600-700m in any showers.

Temperature: **Valleys:** Plus 12 Celsius becoming Plus 19 Celsius.
At 800m: Plus 7 Celsius becoming Plus 10 Celsius.
Freezing level: Above summits.
